

TECHADEMY

30+ YEARS OF EXCELLENCE

HEXp

The Operating System for Higher Education

Organizing higher education the way Uber organized transport

From Classrooms to Capabilities

THE LEGACY MODEL

The 80s and 90s Playbook

- 90% of institutional budget locked in physical infrastructure — buildings, labs, server rooms
- Fixed, rigid curriculum with zero flexibility for emerging skills or market demands
- One degree = one skill path. A graduate leaves with 1–2 core skills meant to last a lifetime
- Faculty teach what they learned decades ago, not what the industry needs today
- Employment happened with just a Degree Credential

1–2

Skills at Graduation

8–9×

Reskilling Over Career

THE HEXP MODEL

Built for Millennials and Beyond

- Cloud-first: zero dependency on physical infrastructure — learn from anywhere
- Access courses from 1,000+ content providers via ContentXchange
- Students graduate with 5–8 industry-relevant skills, not just one narrow degree
- Online and hybrid delivery eliminates the 4-year campus lock-in
- No reskilling crisis: skills are continuously updated throughout the learning journey
- Employers are now transitioning from "Credential-based Hiring" to "Skill-Based Hiring"

5–8

Skills at Graduation

0

Reskilling Gap

Legacy: 4 years, 1 campus, 1–2 skills, 8–9 reskilling cycles. → **HEXp:** 4 years, infinite sources, 5–8+ skills, future-ready from day one.

THE CHALLENGE

The Chaos Behind the Campus

What chairmen and directors face daily — and why the status quo is unsustainable

15+
SILOED TOOLS

10-15 Disconnected Systems

ERP, LMS, attendance, exams, placements, hostel, library — none talk to each other

6+
MONTHS WASTED

Manual Audit Preparation

NAAC/NBA audit prep takes months of faculty time with manual data collation

0%
LIVE INSIGHTS

Zero Real-Time Visibility

No live dashboards for student outcomes, faculty performance, or institutional health

2025
DEADLINE PRESSURE

NEP 2020 Compliance Gap

No tooling for OBE, Academic Bank of Credits, flexible entry/exit, or multidisciplinary programs

90%
LEGACY BOUND

Outdated Physical Infrastructure

Massive investments locked in legacy classrooms, labs, and server rooms built for a pre-digital era

73%
WANT DIGITAL

Rising Student Expectations

Students expect digital-first experiences while institutions run outdated portals from 2010

THE REAL COST

What Inaction Costs You

Every semester without an integrated platform compounds the damage

2,400+
Faculty Hours

Wasted annually on manual data entry, report generation, and audit preparation across disconnected systems

High
Compliance Risk

Manual NAAC/NBA preparation leads to incomplete submissions, lower grades, and failed accreditation cycles

15-25%
Student Attrition

Poor digital experience, lack of academic advising tools, and limited placement support drive students away

₹30-50L
Annual IT Spend

Maintaining fragile integrations between legacy vendors instead of investing in innovation

"The question isn't whether you can afford to transform — it's whether you can afford not to."

Exponential Expansion: The Organizer Model

Every industry that got "organized" saw exponential growth in access points

Credit/Debit Cards

Visa

10 issuers

100,000+

Food Service

McDonald's

100 outlets

35,000+

Hospitality

Airbnb

1M rooms

10M+

Transportation

Uber

100K cars

3.5M+

Decentralized Front End + Centralized Platform = **Exponential Access Points**

- Standardized quality, localized delivery — like McDonald's franchises or Uber drivers
- Technology platform handles complexity; front-end partners handle relationships
- Network effects: every new participant makes the platform more valuable for everyone

HEXp — The 5th Organizer

- ✓ 60,000+ institutions running 15+ disconnected tools each
- ✓ Standardizes NEP 2020 compliance, OBE, NAAC/NBA across every institution
- ✓ Enables content creators, ed-tech providers, and employers to reach institutions at scale
- ✓ One platform replaces fragmented ERP, LMS, assessment, placement, and accreditation systems

Organizing vs Participating

WHY ORGANIZING WINS

A Role on Its Own

HEXp doesn't compete with ERP vendors or LMS providers. It creates the unified arena where institutions, content providers, employers, and students all connect.

A Specialized Skill

Connecting 60,000+ institutions to content providers, assessment engines, placement networks, and regulatory frameworks requires deep expertise no single ERP vendor possesses.

Value Exceeds Participants

Just as Uber's market cap exceeds all taxi companies combined, the organizer of higher education will be more valuable than the sum of all point-solution vendors.

Always an Outsider

Incumbent ERP vendors are too invested in legacy models. Disruption always comes from outside: Uber wasn't a taxi company, Airbnb wasn't a hotel chain.

WHAT ORGANIZING ENTAILS

Buyer-Side Value — Institutions

Onboard with zero friction: pre-configured NEP 2020 compliance, automated NAAC/NBA audit readiness, integrated ERP replacing 15+ tools.

Producer-Side Value — Content & Service Providers

Enable ed-tech companies, content creators, and industry partners to publish, license, and monetize courses across the entire HEXp network.

Platform Focus — The Invisible Infrastructure

Massive investment in multi-tenant architecture, role-based access, AI-powered analytics, regulatory compliance engines, and data isolation.

Demand → Consumption — Removing Barriers

Pre-built OBE workflows, automated CLO/PLO mapping, one-click NAAC data, AI assessments, and integrated placement pipelines.

HEXp is not another ERP vendor. **HEXp is the organizer of higher education.**

INTRODUCING

One Platform. Every Function. Zero Fragmentation.

POLICY COMPLIANCE

NEP 2020: Built-In, Not Bolted On

Every NEP mandate is a native feature — not a patch or add-on

Multidisciplinary Education

Support for flexible curricula spanning arts, science, and technology — breaking down departmental silos

- ✓ Cross-department course enrollment
- ✓ Interdisciplinary program builder
- ✓ Flexible credit structures

Flexible Entry & Exit

Students can exit at multiple points with appropriate certification and re-enter seamlessly

- ✓ Certificate after 1 year
- ✓ Diploma after 2 years
- ✓ Degree after 3-4 years

Academic Bank of Credits

Full ABC integration for credit accumulation, storage, and transfer across institutions

- ✓ Digital credit ledger
- ✓ Cross-institution transfer
- ✓ Lifetime credit tracking

Holistic Development

Track co-curricular, extra-curricular, and community engagement alongside academics

- ✓ 360° student profile
- ✓ Skill-based assessment
- ✓ Outcome tracking

ACADEMIC EXCELLENCE

Outcome-Based Education Engine

The most comprehensive OBE implementation in Indian EdTech

CLO-PLO Mapping

Map Course Learning Outcomes to Program Learning Outcomes with visual matrices and automated alignment checks

Bloom's Taxonomy Integration

Every outcome tagged by cognitive level - ensuring curricula progress from knowledge to creation

NHEQF Compliance

National Higher Education Qualification Framework dashboard with level-wise tracking and gap identification

AI-Generated Outcomes

AI suggests learning outcomes based on course content, industry standards, and regulatory requirements

Automated Attainment

Real-time attainment calculation from assessment data - no manual spreadsheets needed

Audit-Ready Reports

One-click generation of OBE reports formatted for NAAC and NBA submission requirements

ACCREDITATION

NAAC & NBA Audit Readiness

From months of preparation to one-click compliance

01 Criterion-wise Data Collection

Automatic data aggregation from all modules mapped to NAAC/NBA criteria — no manual data entry

02 AI-Powered Gap Analysis

Identifies missing data points, weak areas, and improvement opportunities before submission

03 SSR Auto-Generation

Self-Study Report generated from live institutional data with formatting per NAAC guidelines

04 NIRF Ranking Predictor

Simulate your NIRF ranking based on current parameters and identify areas to improve

⚡ The Impact

90%

Reduction in audit prep time

100%

Data traceability for every criterion

A++

Grade readiness with proactive gap alerts

Real-time

Compliance dashboard for leadership

OPERATIONS

Complete ERP: The Institutional Backbone

15+ fully integrated modules — all sharing a single data layer

Admissions

Scholarships

Hostel

Library

Canteen

Transport

Grievances

Health Center

Security

Inventory

Committees

Timetable

Certificates

Alumni

Departments

All modules share a **unified data layer** — eliminating duplicate entry and ensuring consistency.

15+

INTEGRATED MODULES

INTELLIGENCE LAYER

AI-Powered Intelligence

AI that understands education — not just generic chatbots

NATURAL LANGUAGE

Hex AI Assistant

Conversational AI for campus navigation — students, faculty, and admins can ask anything about their academic journey

AUTO-GENERATE

AI Assessment Builder

Generate question papers from learning outcomes and Bloom's levels with automatic rubric generation

AUTO-GENERATE

AI Content Curation

Smart content recommendations based on curriculum gaps, student performance, and learning objectives

NATURAL LANGUAGE

Predictive Analytics

Identify at-risk students, predict dropout probability, and recommend interventions before it's too late

AUTO-GENERATE

NEP Gradebook Automation

AI-powered grade computation with CGPA, grading schemes, and NEP-compliant transcript generation

AUTO-GENERATE

Intelligent Scheduling

AI-optimized timetable generation considering faculty availability, room capacity, and student preferences

MARKETPLACE

ContentXchange

India's first education content marketplace — share, license, monetize

Cross-Institutional Exchange

Faculty from one institution can share courses with another - expanding course catalogs without hiring

Revenue Sharing Model

Content creators earn when their courses are licensed by other institutions — incentivizing quality

Multi-Modal Content

Support for video lectures, interactive labs, assessments, and full course packages

License Management

Institution-level licensing with usage tracking, renewal management, and compliance reporting

Why ContentXchange?

- ✓ Reduce faculty workload by importing ready-made courses
- ✓ New revenue stream for institutions with strong content
- ✓ Quality courses accessible to Tier-2 and Tier-3 colleges
- ✓ NEP-aligned multidisciplinary content ready to deploy

LEARNING DELIVERY

HEXp Studio

Create, deliver, and track learning experiences across all modalities

Screen + Webcam Recording

Faculty can record lectures with screen share and picture-in-picture webcam overlay

Live Transcription

AI-powered real-time transcription and subtitle generation for all recorded content

Gamified Content

Interactive quizzes, polls, and engagement tools embedded directly in the learning flow

Multi-Modal Learning

Physical, phygital, and fully digital learning modes — one platform adapts to all

Cloud Labs Integration

Virtual labs and coding environments accessible from any device, any location

Course Builder Studio

Drag-and-drop course authoring with module builder, sequencing, and prerequisites

EMPLOYABILITY

Placement & Career Readiness

From campus to career — a complete placement ecosystem

AlphaRecrew Integration

Direct integration with recruitment platform for seamless campus hiring workflows

AI Interview Practice

Students practice with AI-powered mock interviews tailored to their target roles and industries

Placement Analytics

Real-time dashboards showing placement rates, salary bands, company-wise stats, and trends

Employer Portal

Companies post jobs, schedule drives, filter students, and manage offers — all self-service

Industry-Readiness Score

Composite score combining academics, skills, certifications, and soft skills assessment

Complete Drive Management

End-to-end campus drive management: scheduling, shortlisting, rounds, offers, and reporting

INFRASTRUCTURE

Multi-Tenant Architecture

One platform, infinite institutions — each with complete data isolation

Single Instance, Multiple Tenants

Deploy once, serve every institution. Shared infrastructure with zero data cross-contamination.

Tenant-Isolated Data

Row-level security ensures each institution only sees its own data — verified at the database layer.

Role-Based Dashboards

Admin, Registrar, HOD, Faculty, Student, Advisor — each role sees a tailored experience.

Enterprise-Grade Security

SOC-2 ready architecture with encryption at rest and in transit, audit logging, and RBAC.

Scales From

THE CONVICTION

Why HEXp Wins

Four irreversible trends that make HEXp the inevitable choice

Skills Over Degrees

The shift is irreversible. Institutions that embrace outcome-based, skill-focused education will thrive. Those that don't, won't.

Integrated Beats Fragmented

Every additional point solution adds complexity, cost, and risk. One platform eliminates all of that — from day one.

AI Compounds Advantage

The earlier you adopt AI-driven education, the more data you collect, the smarter the system becomes. First-mover advantage is real.

30 Years Domain Expertise

Techademy brings three decades of education and technology expertise — not a pivot from food delivery or social media.

The Institutions that move first will define the next decade of higher education

Compliance & Governance Framework

Enterprise-grade security, privacy, and AI governance — built in from day one

EU Artificial Intelligence Act

Applies extra-territorially to providers and deployers of AI systems within the European Union

ISO/IEC 27001:2022

Design, development, operation, monitoring, and maintenance of information security systems for cloud-based and hybrid solutions

Encryption & Key Management

Mandatory encryption and key management to protect information assets, ensuring compliance with ISO/IEC 27001:2022, ISO 27701:2019, and DPDP Act

3rd Party Risk

Governance and Accountability; Data Quality; Interpretability; Transparency; Fairness; Privacy; Security and Robustness; Risk Management

ISO/IEC 27701:2019

Privacy Information Management System for processing of personal data in cloud-based and hybrid solutions

ISO 42001:2023

Artificial Intelligence Management System

Data Protection Impact

Processing activity involving personal and professional data to support AI-driven recruitment and assessment

VAPT (Web Application)

Vulnerability Assessment and Penetration Testing for network-level WAPT engagement

Data Flow Diagram

All actors and external processors interacting with the platform

Global DPA

Data Protection of personal data (candidate, recruiter etc.)

Application Assessment

Process activity and detail; purpose of data processed; data flow and architectural diagram

AI Governance Policy

Ensures all AI, ML, and automated systems operate in a manner that is safe, fair, secure, accurate, lawful, transparent, and accountable

Cookie Policy

Transparency in how user data is collected, stored, and processed through cookies in compliance with DPDP Act, GDPR, ISO 27701

SOC 2 Type II Report

Audit assessing effectiveness of security controls over an extended period — security, availability, processing integrity, confidentiality, and privacy

HEXp Pricing
